

VANCE AIR FORCE BASE

SHARE THE AIR

RAYTHEON T-6A TURBOPROP

Wing Span: 33' 5"
 Length: 33' 4"
 Max Weight: 6,300 Lbs
 Range: 1,000 Miles
 Max Speed: 316 KIAS
 Max Altitude: 25,000'
 Engines: Pratt & Whitney PT6A-48 turboprop

BEECHCRAFT T-1A JAYHAWK

Wing Span: 43' 6"
 Length: 48' 5"
 Max Weight: 16,300 Lbs
 Range: 2,100 Miles
 Max Speed: 330 KIAS
 Max Altitude: 41,000'
 Engines: 2 JT-15D-58 Turboprops with 2,900 Lbs thrust each

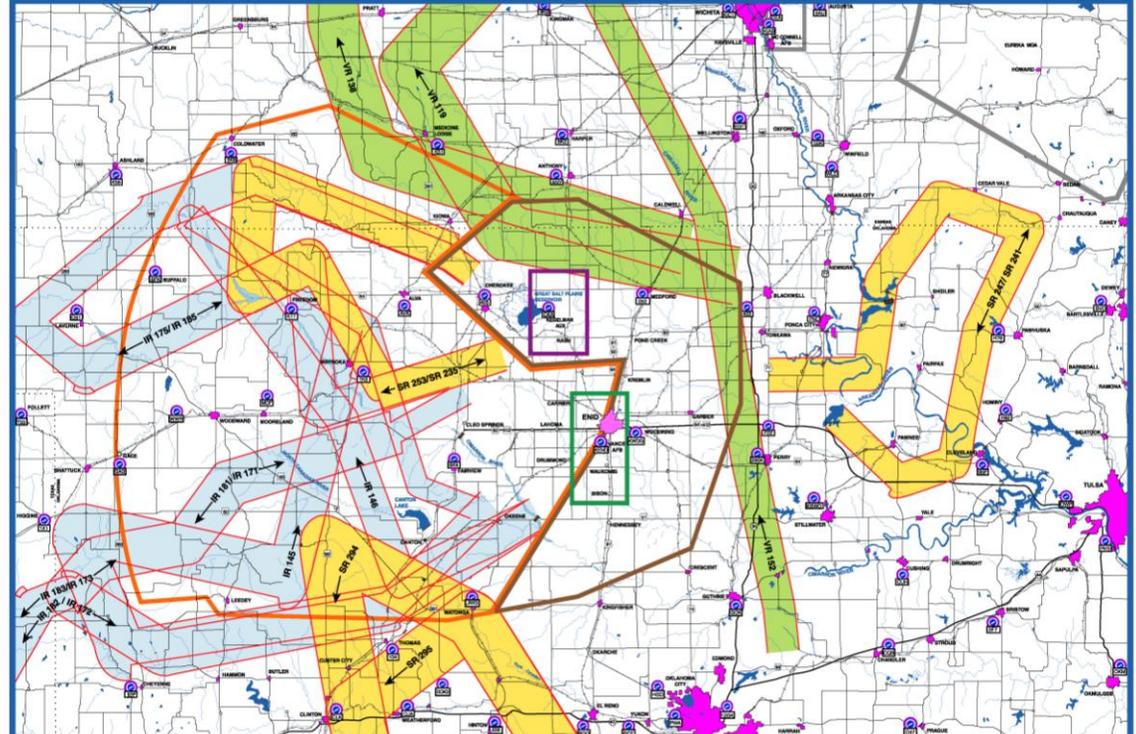

NORTHROP T-38 TALON

Wing Span: 25' 3"
 Length: 44' 4"
 Max Weight: 12,800 Lbs
 Range: 900 Miles
 Max Speed: 710 KIAS
 Max Altitude: 45,000'
 Engines: 2 J85-GE-5R Turboprops, with 3500 lbs thrust each

118.9	WOODRING TOWER

THE THREAT
STUDENT TRAINING IN PROGRESS
 Vance AFB trains over 475 pilots a year in 3 different high performance aircraft. This equates to almost 500,000 aircraft movements around Vance each year and amounts to almost 85,000 flying hours per year. In addition, Vance also has many RAPCON tower controllers in training. The airfield and traffic patterns are normally open from sunrise to sunset on Monday through Friday and most weeknights and Sunday afternoons at a reduced level. The MOA airspace is normally active from sunrise to sunset on Monday through Friday and occasionally on weeknights at a reduced level. We rarely fly on Saturdays, Federal Holidays, and the week between Christmas and New Year's Day. Operating hours are published in the NOTAMS. For your safety, as well as ours, we would like to point out our areas of operations. PLEASE USE EXTREME VIGILANCE IN THESE AREAS. For traffic separation, please contact Vance RAPCON on the frequencies listed.

IF YOU HAVE ANY QUESTIONS PLEASE CALL:
 Vance Safety Office: (880) 213-7235
 Vance Airspace Office: (880) 213-7850

VANCE AIR FORCE BASE
 Depicted in dark green on this poster. Very high density T-6, T-38, and T-1 pattern operations from the surface to 4500' MSL and departures and practice approaches up to 10,000' MSL. The Alert Area extends from the surface up to 10,000' MSL. Departure/Recovery/Pattern speeds range from 110 to 230 KIAS for the T-6, 155 to 300 for the T-38, and 100 to 250 for the T-1. Transition Vance AFB outside of 10 miles, or above 6500' MSL.

T-6 MILITARY OPERATING AREA (MOA)
 Depicted in brown on this poster. Airspace extends north, east, and south of Vance AFB from 7000' MSL to FL 220. T-6 aircraft operate in this area performing stalls, spins, aerobatics, instrument work, and formation flying from 70 to 275 KIAS. Many students are solo and some have only 25 hours of total flying time. For separation, contact Vance Approach Control (East) on 125.45.

IFR MTRs (IRs)
 Depicted in blue on this poster. These routes are flown between 3000'-2200' AGL (2000'-4000' MSL). T-6s fly IRs at speeds up to 420 KIAS. T-1s fly IRs at speeds up to 300 KIAS. Many aircraft fly in 2-ship formations along these routes. Expect a formation spacing of anywhere from 3 feet up to 2 miles between aircraft. The routes extend between 2 and 6 miles on either side of centerline as shown on this poster. Please cross IRs at a 90 degree angle above 4500' MSL.

KEGELMAN AUXILIARY FIELD
 Depicted in purple on this poster. High density T-6 pattern operations from the surface to 3000' MSL and departures to 6500' MSL. The Alert Area extends from the surface to 10,000' MSL. The controllers only have UHF radios. Kegelmen is closed to all civilian traffic. Transition Kegelmen outside 10 miles or above 6500' MSL. For separation, contact Vance Approach Control (North) on 118.075.

T-38 / T-1 MILITARY OPERATING AREA (MOA)
 Depicted in orange on this poster. Airspace extends west of Vance AFB 10,000' MSL to FL 230. Altitudes between 9,000' and 10,000' MSL, as well as between FL 230 and FL 240, are used extensively for vectoring aircraft to and from this MOA. T-38 aircraft operate in this area performing stalls, aerobatics, instrument work, formation flying and basic fighter maneuvers from 140 to 320 KIAS. Many students are solo. T-1 aircraft operate in this area performing stalls, instrument work, formation flying, and simulated air refueling from 90 to 330 KIAS. For separation, contact Vance Approach Control (West) on 126.75.

VFR MTRs (VRs)
 Depicted in light green on this poster. These routes are flown between 500'-3000' AGL (2000'-4500' MSL). They are flown by Vance assigned aircraft as well as other military aircraft (primarily Tulsa Air National Guard F-15s) at speeds up to 500 KIAS in 4-ship formation. The routes extend between 3 and 5 miles on either side of centerline as shown on this poster. Please cross VRs at a 90 degree angle above 5000' MSL.

MILITARY TRAINING ROUTES (MTRs)
 Routes are normally active from 30 minutes after sunrise to 30 minutes prior to sunset, Monday through Friday and occasionally on weekends. For information about MTRs and their hours of operation, contact any FSS within 100 nautical miles of the route. This is a very demanding type of flying. Please attempt to cross/avoid these routes using the information listed under each type of route.

SLOW SPEED LATRS (SRs)
 Depicted in yellow on this poster. These routes are flown between 900'-1500' AGL (2000'-3000' MSL). T-6 and T-1s fly SRs at speeds up to 250 KIAS. Many T-1s fly in 2-ship altrop formations. The routes extend between 2 and 4 miles on either side of centerline as shown on this poster. Please cross SRs at a 90 degree angle above 3500' MSL. SRs are NOT depicted on an route charts.
