Drone Utilization in Greater Enid Area

Drone flights within 5 nautical miles of an airfield are a violation of federal law and have the potential to threaten not only the flying mission of Vance AFB, but the safety of Enid residents as well. Vance AFB has partnered with the FAA, the City of Enid and the Enid Police Department to both increase local education on safe and legal drone operations and in increasing detection and containment of improper and illegal utilization. Vance AFB has established community access numbers and an organizational email account to contact with questions regarding drone operations. We welcome questions and are more than happy to work with recreational and commercial operators, as it falls within our mission parameters.

Vance Drone UAS Operations Request
Commercial: (580) 213-7820
Email: Vance.Drone.UAS.Request@us.af.mil
